

FRESHPET MICROWAVE INSTRUCTIONS

WHY MICROWAVE?

- Provide your pet a warm meal straight from our kitchens to yours.
- Some pets prefer their food to be heated up or even adding a little bit of water to moisten up the product.

HOW TO MICROWAVE OUR PRODUCT

Dog Rolls

1. Get a microwave safe plate or bowl.
2. Measure out the product you're going to feed according to feeding guidelines for your dog. Be sure to remove the packaging prior to microwaving.
3. You can either feed this roll as a whole slice or diced up into pieces. Take this into consideration when using the wattage chart to figure out how long to microwave the product.
4. If you feed as whole slices, be sure to flip halfway through. If feeding as diced pieces, spread out the pieces to fully absorb heat.
5. Use the wattage converter to find the amount of time to microwave the product.
6. Once done microwaving, allow the product to cool for 30 seconds to 1 minute before feeding.

Roasted Meals

1. Get a microwave safe plate or bowl.
2. Measure out the product you're going to feed according to feeding guidelines for your dog. Be sure to remove the product from the packaging prior to microwaving.
3. Roasted meals are typically measured out in cups, so to ensure the product is fully heated, spread the pieces out.
4. Use the wattage converter to find the amount of time to microwave the product.
5. Once done microwaving, allow all pieces to cool for 30 seconds to 1 minute before feeding.

WATTAGE CONVERTER

Dog Rolls

Product Type	Amount of Product	Wattage Level												
		600	650	700	750	800	850	900	950	1000	1050	1100	1150	1200
